Following the report from the Advisory Council on the Aged by the Ministry of Health in 1988, a Committee comprising a few members from the GCF Executive Committee and the Christian Medical and Dental Fellowship was formed to conduct a feasibility study on the type of eldercare facility to develop in order to care for the elderly in the years to come. This feasibility study eventually led to the birth of St Luke’s Hospital in 1996. Things have developed since our early years. While our care model remains focused on providing excellent care for the elderly, we have continued to evolve to meet the growing and changing needs of our patients.

Last year, the Board of Directors and the senior management of St Luke’s Eldercare and St Luke’s Hospital, in consultation with the staff, co-created a joint Vision, Mission and Core Values for St Luke’s. Under our new vision and mission, St Luke’s will seek to transform community care, enrich the lives of the elderly and connect the communities.

We are now going through a season of translating these into work plans, projects and programmes for implementation. Throughout the process of translating the conceptual into the pragmatics of daily work, we go about it guided by a set of basic beliefs – our Core Values. Our six core values are compassion, holistic excellence, respect, integrity, stewardship and teamwork. When our core values are clear to us, we are able to define who we are and what we stand for. This in turn shapes our behavior at work and our interactions with patients, clients, caregivers and colleagues. We have also defined a set of behaviors for each core value as a practical way to put our core values into action. As a Christian healthcare provider, we have chosen compassion as the overriding core value.

Through these core values and our care model, we will continue to enable the elderly to age well in the community, providing holistic yet individualised care, through partnerships with our caregivers and partners. Together, we look to God to help us continue to bear fruit in our work with the elderly community and bring healing to body and soul.

I would like to take this opportunity to thank the board members for their leadership and the team at St Luke’s Hospital for the good work they have done for our patients. I would also like to thank Associate Professor Tan Wee Liang, who stepped down as the Treasurer on 28 February 2015. We welcome Mr Samuel Tan who took over from Associate Professor Tan Wee Liang on 1 March 2015.

In His Love we serve,

Dr Peng Chung Mien
Chairman,
Board of Directors
St Luke’s Hospital
I have come that they may have life and have it abundantly.

- John 10:10
Since St Luke’s Hospital started its operations in 1996, we have witnessed significant changes in the healthcare landscape and growing need for medical care for the elderly. The baby boomers that helped build the nation are now ageing. The ageing population grows in size and their need for medical care grows proportionately. The circumstances and challenges in 2015 are very different from those in 1996. But the ‘heartware’ of St Luke’s does not change after 19 years. To address the needs of the ageing population we have today, we need to hold to our core belief of providing compassionate whole person care while improving and being innovative in the way we deliver our care.

We refreshed our vision and mission last year and reaffirmed our core values. Our core values shape and guide our behaviour and this translates to our model of care. I would like to share with you our Model of Care in the ensuing paragraphs.

Firstly, we care for the whole person. We give comfort to our patients and clients by providing physical, spiritual, and emotional care. At St Luke’s, we treat the medical condition as well as what is beyond the condition so that when the patient leaves the hospital, he is able to adjust quickly into their daily routine.

Secondly, we respect our patients, clients, caregivers, and each other. In St Luke’s, we work as a team. We partner with families and communities to deliver quality care with compassion and respect. We treat every patient and client with consideration and dignity, respecting them as people and adults.

Thirdly, we provide individualised care. We provide care designed for each patient and client by a team of dedicated healthcare professionals, and we manage each case individually as no two patients have identical conditions. If the type of care is not available at St Luke’s Hospital, we link up with our eldercare centres for social day care and day rehabilitation. If our patients and clients require a certain type of care provided by our partners in the communities, we will help to arrange for them to get it.

Fourthly, we coordinate our care. We partner with caregivers and other service providers to deliver a wide range of care in a coordinated manner seamlessly - inpatient care, day rehab, outpatient, social day care, community nursing and home care services. We take care of them from the moment they step into St Luke’s Hospital to the point where they are well enough to be on their own.

Finally, we empower our staff and engage our clients. We enable our staff to provide patients, clients, and caregivers with choices, so that they can decide how the best care can be realized for the best quality of life possible.

To be able to deliver this model of care, we have invested in our staff and built a core of talented and compassionate staff. I am proud of my team at St Luke’s Hospital. Our people have received awards in recognition for their commitment and dedication in healthcare. These awards include the Healthcare Humanity Award, Outstanding Social Worker Award and the Intermediate Long Term Care...
Excellence Award. We also invest in our staff by sponsoring them for formal professional training. At the same time, our future leaders undergo continuous training and learning to deepen their knowledge.

I would like to thank our volunteers, church partners, caregivers and other service providers for their dedication and their partnership with us in providing compassionate whole person care for our patients. We have ensured that our care is made available to as many patients as we can by keeping our hospital occupancy above 90%. Together with all our partners, we seek to enrich the lives of the elderly in our care.

Thank you.

Lim Hock Chuan
Chief Executive Officer,
St Luke’s Hospital

As part of our Model of Care, St. Luke’s Hospital embarked on our lifelong commitment and journey to transform community care by enabling aging in place through the delivery of holistic and quality care to our patients, equipping both the patients and their caregivers in pursuing a more engaged and fulfilled life, during and after their stay with us.

CARING FOR PATIENTS UNDERGOING REHABILITATION

Providing rehabilitation and preparing the patients for home is one of the core services of St Luke’s Hospital (SLH). More than 90% of patients are admitted to SLH for rehabilitation to prepare them for life at home after an acute episode of major illness. St Luke’s team of rehabilitative professionals is committed to helping our patients to the point that they are able to walk with minimal or no assistance when they leave the hospital.

We provide evidence based therapy and continue to bring in state of the art rehabilitative technologies to increase the recovery potential for every patient. One of the latest developments includes the introduction of robotic technology for upper limb training for our patients who suffer from stroke and undergoing rehabilitation in our Day Rehabilitation Centre (DRC). Customised with individualised care plans, this rehabilitation technology aims to scale new heights in the functional recovery of these patients.
CARING FOR PATIENTS WITH DEMENTIA
Since we started caring for dementia patients two years ago, we have had about 190 patients who were being closely followed up at the outpatient clinic where a total of 400 attendances were recorded last year. This was an increase of about 20% of inpatients from the first year. This is a continuing effort of the hospital to provide enhanced care to the patients with dementia (PWD) in the community setting. 73% of PWDs had functional improvement during their stay in SLH and 73% of the caregivers of PWDs reported improvement in the behaviour management of these PWDs.

CARING FOR PATIENTS WITH COMPLEX WOUNDS
We are well known in the intermediate and long term care sector for our ability to manage complex wounds. Over the years, the nurses have developed extensive experience and expertise in dealing with a large variety of wound cases. These wounds range from pressure ulcers to surgical abdominal wounds, orthopedic stumps and abrasion to excoriation. In 2014, St Luke’s saw an increase of 7% or 1,400 wound cases.

Tapping on the latest technology, an outcome-oriented approach is adopted and different evidence based treatment modalities are actively explored to optimise healing of the wounds. Working with the multidisciplinary team, individual care plan is created for each patient to customise care and equip caregivers on caring for the wounds at home.
Caring for Our Patients

After They Are Discharged

St Luke’s Hospital also provides a full spectrum of services that ensures the continuity of care for the patients from the community hospital to various outpatient services e.g. Outpatient Clinic, Day Rehabilitation Centre and Home Care Services. Patients who are discharged from St Luke’s can now enjoy a seamless and holistic journey in their recovery process and as they age in place in their own home.

Our Outpatient Clinic adopts the role of the Family Physician for the patients and actively look at the overall and holistic management of the patients’ multiple and complex medical conditions. The clinic works closely with the Specialist Clinics at National University Hospital in providing shared and integrated care for the patients.

Our Outpatient Clinic is a CHAS (Community Health Assistance Scheme) accredited clinic since October 2014. With the scheme in place, patient’s out-of-pocket payments for their respective chronic disease follow-up consultation, medications and investigations at the clinic are reduced.

St. Luke’s Home Care Services, comprising medical, nursing and therapy services; form part of the integral post discharge services that are developed to serve a group of patients who have limited access to healthcare institutions because of their medical and functional conditions. With the home medical and nursing services, many patients are able to be cared for in their own homes, which otherwise may have to be cared for in nursing homes.
The Home Therapy Services, comprising Physiotherapy, Occupational and Speech Therapy provide the interim home based treatment after discharge from hospitals and prepare the patients to eventually attend the centre based services in the community.

The Day Rehabilitation Centre takes on the role of continuing rehabilitation after the patients are discharged from the hospital. The program aims to assist the patients to reintegrate back into their home and community. It also continues to explore ways to maximize the carryover of the physical recovery of each individual patient and translating them into meaningful tasks and functions that enable them to lead a normal life at home and in the community.
ENGAGING THE PATIENTS THROUGH DIVERSIONAL THERAPY

As part of caring for the whole person, we provide diversional therapy programmes. These programmes engage the patient in leisure activities to enhance the psychological, spiritual, social, emotional and physical well-being. These activities are jointly led by the nursing team, volunteer management team and supported by volunteers. Some of the activities include Clown Doctors, balloon sculpturing, magic shows, arts and crafts, music and gentle exercises. The therapy benefits about 220 patients every month.

ENGAGING THE PATIENTS THROUGH FOCUS GROUPS

We believe in our patients’ feedback and input. They play an important role in helping us improve our services. During their stay in the hospital, we engage them to share their experience with us. The service excellence unit organises quarterly focus groups and conducts pre admission and discharge walks to engage the patients and their caregivers. It is through these engagements that we gain valuable in-depth information about our patients’ experiences and feelings. This helps us to improve our services and care delivery.
As St Luke’s embarked on phase two of the expansion project in 2014, the Inpatient Gym, Outpatient Clinic and wards underwent a facelift to enhance the facilities and services.

In August 2014, the inpatient gym welcomed its first group of patients with a bigger and brighter gym. Equipped with the latest rehabilitation equipment and under the care of experienced therapists, the new inpatient gym provides patients with a calming environment as they exercise their way towards recovery.

In March 2015, we opened a new ward with dementia-friendly amenities. Some of the features include observation rooms for close monitoring of patients and a multi-purpose room for social and diversion therapy. The ward was designed to be dementia friendly, with features such as an activity room in a safe and conducive environment for patients with dementia, bold colors to brighten the environment and patterns on the floor to help patients identify their cubicle. The ward is one of the first to be equipped with the bed fall system that is connected to the nurse call system, which alerts a member of the care team when a patient attempts to get out of bed. The ward provides opportunity for specialised and holistic care for dementia patients.
Our people are at the heart of everything we do at St Luke’s Hospital. Their dedication and effort allows us to provide quality care to our patients as we transform community care. We celebrate their achievements and the recognition they receive from various authorities in the healthcare sector.

**THE HEALTHCARE HUMANITY AWARD**

The Healthcare Humanity Award (HHA) is given to healthcare workers who are inspirational role models who exemplify the values of courage, extraordinary dedication, selflessness and steadfastness in ethics, compassion and humanity. Three of our staff received the Award last year.

**PUBLIC SERVICE PS21 EXCEL**

Organised by the Singapore Public Service, the PS21 EXCEL event showcases and celebrates innovative ideas, policies and projects from individual and team contributors, creating outcomes that benefits the public.

St Luke’s Hospital collaborated with the Institute of Technical Education College West, for the project Puppetry Robotic Glove System – A Cost Effective Rehabilitation Device For Stroke Patients. The team received the Gold Award in the Most Innovative Project / Policy category.
SHARING OF KNOWLEDGE AND EXPERTISE

St Luke’s Hospital continues to provide training for both clinical staff (postgraduate) and undergraduate students in area of Rehabilitation Medicine, Geriatric, Sub-acute and Family Medicine.

To share the knowledge and experience with the public and fellow healthcare professionals, our staff were invited to conferences both locally and overseas. Our nurses continue to train and educate fellow nurses in the area of wound care management through the annual wound conference and workshops.

The work they do contributes to the better care for the elderly in the community it serves and to the Intermediate and Long Term Care sector.

ORAL PRESENTATION

a. Dr Tong Ka-mun gave an oral presentation on ‘Successful Aging’ at the Regional Conference on Integrated Care and 1st Singapore-Hong Kong Congress on Innovation in Nursing Practice.

b. A/Prof Tan Boon Yeow, Medical Director, and Cheung Siew Li, Assistant Director, Medical Social Work Department, gave a talk on “The Service and future Challenges Faced in Singapore” as well as conducted workshop sessions on the setup of Dementia services at the Regional Geriatric Conference Newcastle Medicine, Malaysia, Johor Bahru on 11 October 2014.

c. A/Prof Tan Boon Yeow was an invited speaker at the Lions Home Inaugural Nursing Conference (26-27 March 2015) and gave a plenary presentation on the topic “WOW! Research in Intermediate and Long Term Care Settings”.

d. Ms Sarah Lo was invited to give a presentation on the topic of “Dementia Client’s Care Giver Stress” at National Occupational Therapy Congress.
SHARING OF KNOWLEDGE AND EXPERTISE

PUBLICATIONS

a. In FY 2014-2015, two papers entitled “Acupuncture Causing Methicillin-sensitive staphylococcus aureus spondylodiscitis resulting in bacteremia and bacteriuria” and “Diagnosing bacteremia early in older adults” authored by Dr Tong Ka-mun were accepted for publication by Journal of American Geriatrics Society and Annals of Medicine, Singapore respectively.

b. A paper entitled “Factors and trade-offs with rehabilitation effectiveness and efficiency in newly disabled older persons” co-authored by A/Prof Tan Boon Yeow was published in the Arch Phys Med Rehabilitation in October 2014.

c. Dr Chong Tsung Wei and A/Prof Tan Boon Yeow co-authored “Stress Fracture of the Ulna associated with Bisphosphonate Therapy and Use of Walking Aid” was accepted by Osteoporosis Int. in May 2014.

POSTER PRESENTATION

ILTC Quality Festival 2014, Poster Competition – Merit Award

i. Dementia Care Education For Care Giver

ii. Dressing Kit For Home Care Patients Needing Wound Care

WOUND CONFERENCE

St Luke’s Hospital held its eighth Wound Care Conference from 23 to 24 May 2014. The annual conference and workshop had over 400 local and overseas participants in 2014.

CERTIFIED PRE-REGISTRATION TRAINING CENTRE

St Luke’s Hospital was given approval from the Singapore Pharmacy Council and became the first Community Hospital in Singapore to be recognised as a training centre to train fresh graduates in pharmacy to become fully registered pharmacists.
COLLABORATING WITH OUR PARTNERS

St Luke’s Hospital recognises the need to work closely with tertiary hospitals, volunteers and other partner organisations to provide seamless care for our patients and clients as they navigate the healthcare system. Leveraging on their strengths, we are able to provide patient care that is fully coordinated, taking care of their medical, physical, emotional and spiritual well-being.

PARTNERING WITH RESTRUCTURED HOSPITALS

We work closely with National University Hospital (NUH) to provide patients with seamless transition between care settings in different stages of their illness. Waiting time for patients from the emergency medical department has also been shortened with direct admission into SLH where necessary.

A number of fast track initiatives were launched with the aim of expediting transfer of appropriate patients from NUH to SLH for inpatient rehabilitation. These initiatives include:

- Total Knee Replacement Programme
- Total Hip Replacement Programme
- Hip Fracture Programme
- Stroke Programme
- Extended Diagnostic Treatment Unit Initiative

PARTNERING WITH OUR VOLUNTEERS

St Luke’s is blessed to have very dedicated groups of volunteers who spend time at the hospital and eldercare centres each week with patients and clients. The volunteers helping out at St Luke’s range from the individual volunteers to student volunteers, community & corporate volunteers as well as church partners. They bring with them a range of skills and life experience and their work often go unnoticed. But the things they do make a big difference to the patients and clients in their recovery process.
COLLABORATING WITH OUR PARTNERS

PARTNERING WITH OUR DONORS

We continue to raise funds to help patients with financial difficulties at St Luke’s Hospital. Over the past year, we have worked with communities, companies, government agencies, healthcare institutions, individuals and other non-profit organisations. We are heartened by the generosity of our donors. They help to bring a smile to our patients. We organized the following fund raising events last year.

a. St Luke’s Hospital Charity Golf tournament was held in July at Tanah Merah Country Club’s Tampines course. We would like to thank the following who contributed towards the event’s tremendous success:

- Organising Committee from Bethesda Frankel Estate Church
- Fresh ‘N’ Natural Foods Pte Ltd
- Mercedes Benz Singapore
- Lee Welded Mesh Singapore Pte Ltd
- National University Health System
- PSA International Pte Ltd
- The Cocoa Trees

b. The inaugural Dymon Asia - St Luke’s Appeal Luncheon was held in August 2014 at the Fullerton Hotel. It was sponsored by Dymon Asia Capital. Ambassador-at-Large at the Ministry of Foreign Affairs, Professor Tommy Koh, graced the event as our Guest-of-Honour.

Over 200 guests attended the luncheon as Professor Koh spoke about the values of philanthropy and volunteerism, which we could embrace to benefit the underprivileged in our society.

c. We were thankful to be nominated as the beneficiary for Lexus Charity Golf 2014. Held in August at the Tanjong Course of Sentosa Golf Club, the tournament saw participation by members from the Lexus Club.
d. Group99, comprising a group of golfing enthusiasts from SICC, also held a charity golf tournament cum dinner to celebrate their 15th anniversary at the Singapore Island Country Club to raise funds for St Luke’s. Minister for Health, Mr Gan Kim Yong and Mayor Teo Ho Pin graced the event as Guest-of-Honour and special guest respectively. Mr Gan furthered his support for our cause by contributing two pieces of his Chinese calligraphy paintings, which he painted himself, for auction during the dinner. We are thankful for the generosity shown by Group99 towards St Luke’s Hospital.

e. St Luke’s Hospital is richly blessed to have forged close relationships with our community partners over the years. Ngee Ann Polytechnic’s Business and Accountancy Society has adopted us once again as the beneficiary of their run – Fund My Life, this year. Themed “Limitless”, the 4th edition of this event was held in October 2014 with a total of 236 participants.
COLLABORATING WITH OUR PARTNERS

PARTNERING WITH SCHOOLS

a. St Luke’s Love & Share Hongbao Donation Drive 2015 saw great support from the various schools and churches. We would like to thank the following new participants who helped us raise funds for our patients.

- Bedok Methodist Church Kindergarten
- Brainy Juniors Kindergarten
- JHS Montessori Kindergarten
- Queenstown Good Shepherd Kindergarten
- Sengkang Methodist Children Centre
- St Andrew’s Junior School
- The Capstone Kindergarten
- TPBC Kindergarten
- Zhonghua Primary School

b. St Luke’s would also like to thank the following educational institutions for their steadfast dedication and donations toward various fundraising events:

- Bethesda (Bukit Arang) Kindergarten
- Bethesda (Serangoon) Sunbeam Kindergarten
- Chen Li Kindergarten
- Faith Kindergarten
- Gracefields Kindergarten
- Henry Park Primary School
- Jurong Christian Church Kindergarten
- Living Sanctuary Kindergarten
- Methodist Girls’ School
- Paya Lebar Methodist Girls School
- Princess Elizabeth Primary School
- Tung Ling Kindergarten
- Yio Chu Kang Chapel Kindergarten

c. Allied Health Division from NYP visited SLH with a team of 20 Rehab Physicians from Jiang Su province in China. We had exchanged ideas and issues in community rehabilitation.
PARTNERING WITH CHURCHES

Church partnership is likened to a big umbrella that encompasses volunteers, support, finances and ministry involvement with patients and staff. Greater coverage of the patient’s needs were provided through corporate collaboration with some 36 partners in group ministry and through 19 volunteers in rendering individualised care to patients at least twice a week.

- Bedok Lutheran Church
- Church of Singapore
- Jurong Christian Church
- Mount Carmel Bible-Presbyterian Church
- Prinsep Street Presbyterian Church
- Queenstown Chinese Methodist Church
- The Bible Church Singapore
- Yishun Christian Church (Lutheran)
