

Wound bed preparation is an essential part of the wound healing process. Removal of non-viable tissue from wound bed is a fundamental aspect of wound care and conservative wound debridement should only be undertaken by experienced and trained healthcare providers. Join this course, organised by St Luke's Hospital, to be equipped with wound debridement skills.

Course Objectives

- Be equipped with advanced knowledge and skills to perform wound debridement.

Training Methodology

Lecture, group activities and discussions, practicum demonstration, case presentation.

Course Outline (1 Full Day)

			• Face to Face Session
• 1	1	3 Mar 2021	Lecture & Discussion on: <ul style="list-style-type: none">• Describe the anatomy and physiology of viable and non-viable tissues and structures.• Recognise anatomical structures and types of tissue commonly seen in sharp debridement.• Explain how to utilise appropriate debridement modalities to facilitate the phases in physiology of wound healing.• Identify the types of debridement modalities.• State the indications and contraindications according to the types of debridement modalities.• Describe the preparation of sharp wound debridement process.• Demonstrate sharp debridement techniques.• Evaluate and document treatment using sharp debridement.• Discuss the legal implications, and policy and procedures related to sharp debridement.

Target Audience

Registered Nurse, Doctor

Course Time

9am - 5pm

Course Fee: \$331.70 (Including GST) Prevailing course fee subsidy at 90% for Singaporeans/PRs and 45% for Work Pass Holders working in eligible community care organisations.

Trainers' Profile

Jan Rice trained at The Alfred Hospital and progressed through various training programmes to eventually study Plastic Surgery Nursing.

This led her into wound management in 1993 when she joined Wound Foundation of Australia. Jan has been training in wound management for Monash University, La Trobe University and Training Beyond 2000. She has authored many short papers on wound management and co-authored book chapters and a training manual in plastic surgery nursing.

Jan holds a Masters in Wound Care, and now runs her own consultancy business Jan Rice WoundCareServices Pty Ltd, which sees her consulting in aged care, acute private surgical hospitals and private homes. Since 2006, Jan has also started running a wound clinic at Ashwood Medical Group in Ashburton, Melbourne.
