Support and care for stroke, Parkinson's disease and other neurological conditions

Caring for chronic wounds, pressure injuries and other skin issues

The SLH Difference

Comprehensive Care, Every Step of the Way

From hospital to home, we provide a full spectrum of healthcare services — ensuring seamless and continuous support for your recovery.

Holistic Care Philosophy

Our Clinical, Social, Pastoral care model addresses your physical, social and emotional needs, restoring you beyond wellness to wholeness.

Award-Winning Excellence

Nationally recognised for service quality and innovation, we deliver proven programmes designed to guide you towards peak recovery.

Your Care, Our Collective Expertise

Our team of healthcare professionals works together to design a personalised care plan tailored to your unique needs.

Our Services

St Luke's Community Clinic specialises in caring for individuals across their health journey — from preventive care to the management of acute and chronic conditions. Led by Family Medicine Specialists and Family Physicians, our multidisciplinary team delivers holistic and coordinated care in one place. With consolidated appointments, we make care simpler, more seamless and connected for you.
