

Integrated Home Health

At St Luke's Hospital, we care for the whole person, journeying with patients through our Inpatient, Outpatient, Home Care and Community-based Programmes. Under the new Integrated Home Health programme, home-bound clients under Home Care Service can receive continuity of care as they approach the end of life.

**Home Care
Service**

Our Home Medical, Home Nursing and Home Therapy team provide holistic person-centric care for clients with chronic conditions to maintain independence and quality of life.

Approaching End of Life

Integrated Home Health

Our multidisciplinary team continues to journey with clients, their families, and caregivers to provide seamless and holistic care.

What are the benefits of IHH?

Spend last days in the comfort of one's home

Maintain comfort and dignity for clients

Reduced transition from different care settings and providers

Added Services:

End of Life Care

- Address clients' physical, psychosocial and spiritual needs
- Specialist support for complex needs and inpatient hospice care, where needed

Advance Care Planning

- Facilitate conversations on end-of-life care planning for clients, their families and caregivers

Caregiver Support

- Caregiver training and resources
- Bereavement support and legacy work
- After office hour phone consult support
